

Deliverable #1: Inventory of Boone County Service Providers

The Boone County Children's Services Board (BCCSB) is taking steps to understand more about children's services in Boone County. BCCSB contracted with the Institute of Public Policy (IPP) in the Truman School of Public Affairs at the University of Missouri to conduct an inventory of Boone County children's services. BCCSB wishes to make wise expenditures of the Children's Services Fund and seeks targeted information on the number and variety of local services aligning with the Missouri Statutes 67 & 210. This inventory report and analysis provide the information necessary to help guide BCCSB's future funding strategies.

Missouri State Statute 67.1775 authorizes a local sales tax of one-quarter of one cent to be levied by Missouri counties for the purpose of establishing a Children's Services Fund. This tax was made possible in Boone County following voter approval on November 6, 2012 and is estimated to raise \$6 million dollars annually. According to Missouri Statute 210.861, the Children's Services Fund may be expensed to purchase the following services for children age 0-19 within Boone County:

1. Up to thirty days of temporary shelter for abused, neglected, runaway, homeless or emotionally disturbed youth
2. Respite care services
3. Services to unwed mothers and unmarried parent services
4. Outpatient chemical dependency and psychiatric treatment programs
5. Counseling and related services as a part of transitional living programs
6. Home-based family intervention programs
7. Community-based family intervention programs
8. Crisis intervention services (inclusive of telephone hotlines)
9. Prevention programs which promote healthy lifestyles among children and youth and strengthen families
10. Professional counseling and therapy services for individuals, groups, or families
11. Psychological evaluations
12. Mental health screenings

Overview: Using these twelve categories, the following inventory outlines Boone County providers whose services align with the statute funding parameters. The inventory is organized by applying two methods. The first is based upon category and will place all providers into one or multiple categories depending on their services. The second method is based on provider and will list the eligible services they currently provide to Boone County residents.

Methodology: The Heart of Missouri United Way 211 database is a tool designed to assist community members in locating local social service agencies. This database serves as the starting point for this provider inventory. Three Boone County organizations (*Putting Kids First in Boone County Coalition, The Youth Community Coalition, and Voluntary Action Committee*)

shared their lists of partnering agencies. The lists were cross referenced to identify Boone County service providers who were not listed as part of the 211 database. The City of Columbia, Boone County, and Heart of Missouri United Way’s social services funding allocations (FY2013) identified other social service agencies not yet included in the inventory. Finally, the Missouri Department of Mental Health’s Division of Comprehensive Psychiatric Services publishes an annual list of centerfield providers in Missouri’s Central Region. This list was canvassed for Boone County providers not yet included in the inventory. Thorough review of service provider websites determined the agencies’ service classification within the 12 categories. Phone calls were made to some provider agencies to ensure inventory accuracy. It is important to note that agency categorization is not mutually exclusive; this means many agencies are classified within multiple funding categories. Furthermore, this inventory does not serve as an exclusionary list of fundable agencies; its purpose is to establish a starting point for the Board understanding the breadth and depth of services within Boone County.

Findings: Table 1 is an inventory summary which identifies 46 Boone County agencies as having one or more services/programs which fit into the statutes’ service areas. In total, these agencies provide 108 services/programs to the local community. Figure 1 depicts the distribution of services by category type and it is clear that the majority of services (31 percent) fall under Category #9: *Prevention programs which promote healthy lifestyles among children and youth and strengthen families*. This finding is expected due to the broad nature of the category.

TABLE 1: BOONE COUNTY CHILDREN’S SERVICES INVENTORY SUMMARY BY CATEGORY				
	<i>By Service</i>		<i>By Agency</i>	
	#	%	#	%
Total:	108	100	46	100
Category #1: Temporary shelter	8	7.40	8	17.39
Category #2: Respite care	5	4.62	5	10.86
Category #3: Unwed mothers/parents	15	14.88	8	17.39
Category #4: Outpatient (chemical & psychiatric) treatment	5	4.62	5	10.86
Category #5: Counseling and related services for transitional living counseling	2	1.85	2	4.34
